Genetic Testing

Genetic testing is vital to ensuring proper diagnosis and course of treatment. Many programs have become available in the recent years to make genetic testing more readily available for patients and their family members.

Las Vegas Clinic has partnered with multiple laboratories to offer free genetic testing and carrier testing for siblings and other family members:

- DecodeDuchenne
- EGL Genetics
- Invitae

More to come...

DMD
treatments
available at
LVC

Eteplirsen - weekly
infusion for Exon 51
amenable patients
